

# AI Opportunity Assessment & Governance and Adoption Framework

A DUAL ENGAGEMENT MODEL: THE HUMAN TOUCH + HARD INFRASTRUCTURE

## Identify High-Value AI Opportunities While Protecting Your Operations, Data, and IP

Most organizations are experimenting with AI. Few know where it will create measurable business value — or how to scale it responsibly.

SEIDOR helps organizations identify, prioritize, and operationalize AI opportunities through a dual-track model combining on-site operational discovery, stakeholder engagement, and implementation readiness.

## Unbiased Discovery: Why External-Led Assessments Matter

Internal teams often struggle to surface operational friction or shadow AI usage. We remove this bias and create a neutral environment for unvarnished truths.

- Process inefficiencies
- Operational bottlenecks
- Shadow AI adoption
- Workflow friction
- Governance gaps
- Data limitations

### TRACK 01

## AI Opportunity Assessment

Identifying where AI creates measurable operational and strategic value.

### Key Deliverables:

- Executive AI Readiness Dashboard
- Prioritized AI Opportunity Matrix
- Quantified Business Cases & ROI
- 6–12 Month AI Roadmap
- Quick Wins vs. Transformational
- Departmental Opportunity Mapping

◆ Assessing Automation, Augmentation & Agentic AI potential

### TRACK 02

## AI Governance, Risk & Adoption

Policies, operating models, and structures to scale AI responsibly and safely.

### Framework Includes:

- Regulatory & Risk Map
- Governance Blueprint
- Role-based access controls (RBAC) framework
- Compliance Readiness Assessment
- AI Policy & Guardrails

◆ Addressing Compliance, Security & Reputational Risk

# What Makes SEIDOR Different

AI STRATEGY + AI GOVERNANCE + EXECUTION READINESS

## Beyond Strategy: We Build

Most advisory firms stop at recommendations. **SEIDOR** combines assessment, governance, architecture, engineering, and implementation teams to help organizations operationalize AI securely within existing environments.

- ◆ AI architecture
- ◆ Automation and agentic workflows
- ◆ Enterprise integrations
- ◆ Secure infrastructure
- ◆ Change management and AI adoption enablement

## Vendor-Agnostic Approach

Engagement designed for autonomy and clarity. After delivery, you can:

- Execute internally
- Work with third-party vendors
- [Engage SEIDOR for implementation](#)

## Enterprise AI Transformation

Ideal for organizations seeking to:

- Identify high-value use cases
- Reduce adoption risk & scale responsibly
- Establish enterprise governance
- Align initiatives with operations
- Prepare data & infrastructure foundations

## SEIDOR's Customers Are Already Seizing The AI Opportunity

Organizations that after the AI Assessment and Governance initiative, activated our tailored roadmaps to scale custom co-pilots, automate workflows, and unlock massive capacity.

### SECOND LARGEST HIGH-SPEED RAIL TRANSPORTATION OPERATOR

Deployed a dedicated AI Technical Office and governance framework to identify, evaluate, and prioritize maximum-value AI initiatives.

### GLOBAL SEMICONDUCTOR EQUIPMENT MANUFACTURER

Conducted enterprise-wide AI opportunity and governance assessment across R&D, engineering, and manufacturing operations.

Developed a 5-year transformation roadmap identifying 25 strategic initiatives while establishing governance controls designed to support secure AI adoption and reduce operational risk.

### ONLINE HIGHER EDUCATION INSTITUTION

After a strategic assessment, this institution integrated facial recognition exam auditing, advanced data ingestion, and Amazon-powered multi-agent student support processing over 70,000 exams/session.

## Let's talk about your priorities

Enterprise AI Strategy, Governance, and Transformation
